EXAMINER	Name Robert W. Morgan	ID 70573	Art Unit 3626	Email robert.morgan@uspto.gov	Telephone # (703) 605-4441
-----------------	---------------------------------	--------------------	-------------------------	---	--------------------------------------

APPLICATION	Serial No 09/329,659	Applicant(s) FENTON ET AL.	Filing Date 1999-10-06
--------------------	--------------------------------	--------------------------------------	----------------------------------

Title of the Invention:

SYSTEM AND METHOD FOR PROCESSING AN INSURANCE APPLICATION DURING A
SINGLE USER SESSION

Please perform a **complete prior art search** limited by the earliest priority date of 06/10/1999.

Please **deliver** search results on/in **printout** to/for **examiner shown above**.

Results are **requested for** the date **Tuesday**. (SPE Signature required on RUSH orders).

Please also search by:

☐ INVENTOR(s):

☐ ASSIGNEE:

☒ Attached is a copy of the **cover, abstract and selected claims** relevant to the search focus described below.

Please search for the following:

A warranty or service contract or insurance policy that is purchased, issued, confirmed and activated online and provides immediate coverage to the user before the user logs off the computer or during a single user session without a post user-session delay period.

Voluntary Results Feedback Form

➤ *I am an examiner in Workgroup:* *Example: 3610*

➤ *Relevant prior art **found**, search results used as follows:*

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ *Relevant prior art **not found**:*

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Search results were not useful in determining patentability or understanding the invention.

Selected litigation issues implicating additional insured endorsements.

Lucey, Michael T.; Bruno, Michael D.

Federation of Insurance & Corporate Counsel Quarterly, Fal 1997, p33

DOC TYPE: Journal Article

JOURNAL CODE: FICCQ

ABSTRACT: Provides an overview of several issues involving additional insured endorsements. The questions presented and the different paths the courts have taken to resolve disputes over these endorsements **present issues** not only for **coverage** lawyers, but also for the drafters of business contracts and for those who draft **insurance policy** language. Explores the breadth different courts have assigned to the coverage of the additional insured endorsement and deals with breach of a contract to procure insurance, with an emphasis on applicable principles in the areas of construction law where this issue frequently appears. Also considers apportionment between insurers and the insurer's duty of good faith and fair dealing to an additional insured. (Author/JSS)

Life insurance conditional binding receipts.

Ingram, John Dwight

Federation of Insurance & Corporate Counsel Quarterly, Win 1998, p209

DOC TYPE: Journal Article

JOURNAL CODE: FICCQ

ABSTRACT: When someone applies for a life **insurance policy**, the most common scenario is for the applicant to sign the application and pay the first premium. In return he is given a conditional binding receipt. Under the usual terms of the conditional binding receipt, most insureds will have **immediate coverage** if they die at any time thereafter. Most conditional receipts are clear and understandable, and their conditional nature is usually indicated conspicuously in large letters. It is very much in the public interest to honor and enforce the terms of conditional receipts as they are written. If legislatures and insurance commissioners have decided that the use of conditional receipts is not contrary to the public interest, courts should accept that determination and apply the

provisions of those receipts as they are clearly written. (Author/JSS)

Ways immediately adjoining" and coverage issues : when are the insured premises a public highway?

Allen, T. Eugene, III; Duggan, I. Rose

Federation of Insurance & Corporate Counsel Quarterly, Spr 1994, p289

DOC TYPE: Journal Article

JOURNAL CODE: FICCO

ABSTRACT: Explores the phrase "ways immediately adjoining" as it is found in the automobile exclusion of the standard comprehensive liability **insurance policy**. The phrase is not defined in the policy, leaving definition to the courts, and extremely divergent decisions. Analyzes these decisions and urges insurers to be precise in their policy wording. Getting down to cases over the "plain English" business auto coverage.

Malecki, Donald S.

Rough Notes, Apr 1993, p34

DOC TYPE: Journal Article

JOURNAL CODE: RN

ABSTRACT: When the business auto policy was first introduced in 1978, the most common caveat expressed to producers had to do with the numerical symbol system of designating covered autos. If the wrong number were inserted opposite the coverage as designated on the policy declarations, it was warned, the insured could end up with less coverage than might have been anticipated. In the past 15 years, however, the system of designating numerical symbols has not been a problem, at least not to the extent that this particular issue has had to go to court to be resolved. But there have been some other problems with this policy, **currently** referred to as business auto **coverage**, where the tie had to be broken by the courts.

Industry groups unite on proposal for taxing SPL.

Bests Review: Life/Health, Jun 1988, p5

DOC TYPE: Journal Article

JOURNAL CODE: BLH

ABSTRACT: The American Council of Life Insurance, the National Association of Life Underwriters and the Association for Advanced Life Underwriting agreed on a proposal they will **present** jointly to Congress on the **issue** of taxing single-premium life **insurance policies**. The proposal would change the tax code to identify certain single-premium products which are susceptible to investment uses. Special rules would apply to these products on a prospective basis. Under these rules, loans would be treated as distributions that would be taxed on an income-first basis for a period of ten years after the contracts were issued. Other distributions, including policy dividends paid in cash, also would be subject to the special rules. (Author/SF)

JP 2002063364	A		2	G06F-017/60	

Abstract (Basic): JP 2002063364 A

NOVELTY - An individual's home page web site on the internet can be made use for him/her to apply for an **insurance policy** under non-life category and prescribed grouping. Policy **issuance** is confirmable **immediately** on receipt of prescribed subscription dues from the individual applicant.

USE - Details of policy categories that accept this mode of application from individuals have not been spelt out.

ADVANTAGE - Places non-geographical restraints on the individuals and leads to considerable savings in the time of processing and attendant labor costs.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
DE 19803574	A1		3	G07C-011/00	

Abstract (Basic): DE 19803574 A1

NOVELTY - The method for establishing the beginning of a **warranty** or a guarantee is carried out, so that the actual date from the timer

or the radio reception is stored in the memory storage by the execution of an **activating** procedure, and the **current** circuit interruption is switched off. The activating procedure consists in the operation of a sealed switch. The activating procedure can consist of an input of a date.

USE - Electric appliance, e.g. refrigerator with timer set at actual data, is fed by a supporting accumulator, and is recharged with each connection at the mains. The current supply to the fridge is interrupted every two hours for two hours.

ADVANTAGE - Method establishes start of **warranty** for electrically driven appliance, which ensures that appliance is not operated by customer, without beginning of **warranty** being established.

Abstract (Basic): WO 9931908 A1

NOVELTY - Method involves setting up call from mobile radio to
warranty registration center. Message is sent from mobile radio to
warranty registration center to cause **warranty** period to start.
 Message is sent **immediately** after communication device is **activated**
 . Call from mobile radio to **warranty** registration center is placed
 automatically.

DETAILED DESCRIPTION - INDEPENDENT CLAIM is included for method for
 automatic **warranty** registration of mobile radio, mobile radio.

USE - For mobile radio.

ADVANTAGE - Provides simple and effective method for determining
 when **warranty** period for mobile radio begins.

DESCRIPTION OF DRAWING(S) - Figure shows simplified flow diagram of
 overall operation of mobile radio in accordance with invention.

KR 2000029675 A H04Q-007/32 Based on patent WO 9807288

Abstract (Basic): WO 9807288 A

The method involves conveying a request to activate a cellular telephone to a first cellular telephone network service. Service provider information is fed into the telephone to activate it for operation in the first network. The activation data is written at a predetermined address or addresses of a non-volatile memory of the telephone. The current date is written in the non-volatile memory used for **activation** data. The **current** date is designated as the **activation** date.

The telephone is communicated with via the network. The telephone is deactivated from the network. The telephone conveys a request to a second network provider for activation and has information for reactivating it input from the second network. The reactivation data is written in the non-volatile memory. It is determined whether the predetermined address being accessed to write the reactivation data corresponds to the location of the activation data. If the **activation** data is **present** then it is not overwritten, else the reactivation date is written in the memory.

ADVANTAGE - Allows precise and reliable determination of **warranty** period start.

Abstract (Basic): WO 200299602 A2

NOVELTY - Actuarial data associated with an applicant for insurance under a defined benefit pension plan, such as described in Internal Revenue Code Section 412(i), is entered via at least one user interface and used to generate a variable life insurance policy and/or a variable annuity policy. A separate agreement that extra-contractually modifies the variable life insurance and/or annuity policies is also generated.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) A system for creating a defined benefit pension plan funded using variable life insurance contracts; (A system for creating a defined benefit pension plan funded using variable annuity contracts; (A system for creating a defined benefit pension plan funded using at least one of life insurance contracts and annuity contracts.

USE - For creating a defined benefit pension plan funded with a variable life insurance policy and/or a variable annuity policy.

ADVANTAGE - The method enables the use of a variable life insurance policy and/or variable annuity policy in a 412(i) defined plan, thus taking advantage of improved tax treatment for the employer sponsoring the plan, while at the same time being able to reap higher returns on higher risk investment vehicles.

DESCRIPTION OF DRAWING(S) - The figure shows part of a flow chart for a method of creating a defined benefit pension plan, selection of an appropriate insurance company.

KR 2001079007	A		G06F-017/60	

Abstract (Basic): KR 2001079007 A

NOVELTY - A device for developing intermediate service system of a building and a re-bid method are provided to show a cyber character, a delicate design, a price, a **warranty** deed, and a shape after a completion of a construction in advance at a low price and rapidly when a construction is received or ordered at on-line.

DETAILED DESCRIPTION - A **user** inputs **one** 's credit number and resident registration number, address, name, one's property state etc. in a client member registration page view for joining to a membership of a homepage before a bid registration. If the user inputs and clicks a new construction remodeling, a renovation, an interior, and total sample of a building in a client demanding space using a sample inherent number, the system shows the related sample and an inherent number in a site view. If the user clicks model inherent numbers according to samples in order, moving pictures are shown. If the user inputs a standard sample and confirms an inherent number, an area amount, a height, a material, a color, a design, and construction expenses of wanted construction field, the site transmits a detail drawing, specifications, an estimate to the client through an E-mail.

Abstract (Basic): EP 1009190 A2

NOVELTY - A transmit/receive control section (17) selects, in response to manual input of a called party's telephone number through a **user** terminal (20), **one** of the number of particular telecommunication networks or a public telecommunication network, and reads out, when one of the particular telecommunication networks is selected. An exchange identification number corresponds to the selected particular telecommunication network from at least one table stored in a memory (18).

USE - In a terminal adapter through which a terminal device is connected to a telecommunication network.

ADVANTAGE - Capable of establishing a line connection via a number of telecommunication networks at low costs using simplified connection procedures. Eliminates the need of a user's manual operation to input supplementary information, such as a caller ID and a password, which is to be delivered when requested by an exchange provided in a particular telecommunication network through which the user wishes to establish a line connection. Permits the selection of an appropriate network in the order specified by a user in advance or in an ascending order of toll. Permits an individual common carrier to download its structured toll information to the terminal adapter on the initiative of the common carrier, for constructing a toll database, proper to an individual user, in the terminal adapter.

DESCRIPTION OF DRAWING(S) - The drawing shows an internal construction of the terminal adapter.

Abstract (Basic): US 5956691 A

NOVELTY - The Dynamic illustration computation system (DICS) controls the graphical user interface based on range values of one variable so as to generate continuously varying display of line graph, area graph and bar graph in single screen display for demonstrating the effects of modifying a variable.

DETAILED DESCRIPTION - Dynamic illustration computation system (DICS) (44) performs insurance calculations for determining future values of life **insurance policy**. A graphical user interface (42) operated by the DICS provides **insurance policy 's data** in line graph, area graph, and bar graph to monitor. A charting unit (54) combines the line graph, area graph and bar graph into single screen display on monitor. User can modify a variable in the main screen display (56) to change display of line graph, area graph and bar graph to reveal risk inherent in the life **insurance policy**. The variables may be client's name, gender, rating class, face value life **insurance policy** etc.

USE - In dynamic policy illustration system for displaying future values of life **insurance policy 's data** in graphical format.

ADVANTAGE - Demonstrates to **user** how changing **one** variable in life **insurance policy** affects the future values. Helps agents and clients establish realistic expectation for policy performance which is not guaranteed. Demonstrates actual tradeoffs between premiums and values.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of display device.

Abstract (Basic): JP 9147178 A

The reading inspection method is as follows. The document image including reproduction inhibition pattern for inspection is received from an optical picture input device. This document image data is analyzed by an image processor and suitable expansion is performed.

The pixel group of binary image corresponding to a drawing line which represents non latent image is considered as a connected component. The residual pixel group is expanded. The pixels corresponding to the connected component in first compressed. Then the image data is expanded. The compressed pixel group connected component is compared with surrounding pixels to judge validity of document image.

ADVANTAGE - Discriminates several information at **one time**. Improves immunity against forgery. Raises reliability of validation.

Abstract (Basic): JP 9147175 A

The reading inspection method is as follows. The document image data, for inspection including reproduction inhibition pattern is received from an optical picture input device. This document image data is compressed in the connected component of the digitized pixel. This process is continued until the pixel group corresponding to the drawing line can be removal from a latent image. The binary image which corresponds to non latent image.

The binary image which corresponds to non-latent image is retained. The residual pixel group is expanded. The non latent image part and the corresponding pixel group is treated as a component. The image corresponding to the connected component is compressed. The image is validated when the binary image shape of compressed image remain same as the original part of image that corresponds to connected component

ADVANTAGE - Discriminates several information at **one time** .
Improves immunity against forgery. Raiser reliability of validation.

Electronic meter pointer staking - has instrument cluster pointers rigidly fixed to instrument cluster's core gauge spindles by shrinkable polymer tubing, providing increased reliability.

Patent Assignee: ANONYMOUS (ANON)

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Week
RD 366024	A	19941010	RD 94366024	A	19940920	199442 B

Priority Applications (No Type Date): RD 94366024 A 19940920

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
RD 366024	A	1	B60K-000/00	

Abstract (Basic): RD 366024 A

An automobile's instrument cluster pointers (1) are rigidly fixed to the instrument cluster's air core gauge spindles, (2) by using a polymeric based shrink tubing, (3) the polymeric tubing shrinks to conform to the outer diameter of the pointer shaft, (4) which subsequently squeezes the pointer shaft onto the air core gauge spindle.

The shrinking of the polymer tubing is a **one - time** , irreversible action that allows for permanent adhesion of the pointer, (1) to the spindle, (2) when heated, the inner-wall of the tubing melts and adheres to the surface of the shaft, (4) filling surface irregularities. Various types of heating methods can be used to adhere the tubing.

USE/ADVANTAGE - By integrating the polymer tubing for pointer staking in the assembly process of instrument clusters, a redn in **warranty** returns/costs may be achieved due to the elimination of pointers falling off of air core spindles in the after-market, and an increase in reliability should occur.

Speed's at a premium if you want to buy insurance on the Internet

UK: INSURANCE TO BE OFFERED ONLINE IN FUTURE

Independent (TI) 20 Nov 1999 p.3

Language: ENGLISH

Consumers in the UK will be purchasing the majority of their **insurance policies** via the **Internet** within five years, with many companies offering the advantage of **instant cover**. An increasing number of insurance firms are setting up their own websites and linking up with Internet brokers to market products directly to the customer. Consumers are also using online brokers, such as 1st Quote or Screen Trade, to save time gathering quotations. Both companies will immediately recommend several competitive quotations from various firms, and will offer the chance to purchase a policy online or via the telephone.

Die "Winterthur" vertreibt Versicherungen über das Internet

SWITZERLAND: WINTERTHUR POLICIES ON THE INTERNET

Neue Zürcher Zeitung (NZZ) 30 Jul 1999 p.11

Language: GERMAN

Swiss Winterthur insurance group is now offering motor vehicle **insurance policies** on the **internet**. Customers can combine their own "Webinsurance" cover and sign up for a policy with **immediate coverage**. The policy and contract terms can be printed out. In the year 2000, Winterthur expects to sign around 1,000 policies online. Previously only offers could be calculated (anonymously) on the internet. The new offer is a strategic decision of Winterthur to prepare for the increasing importance of the internet as a communication and distribution channel. However, this development will take some time, so that Winterthur does not expect any economising effect from the new offer. *

Viriyah to offer its policies over Net

THAILAND: VIRIYAH TO SELL POLICY OVER NET SOON

Bangkok Post (XBN) 01 Oct 1997 Database P.3

Language: ENGLISH

Viriyah Insurance, the Thai-based insurance company, will soon be able to offer its **insurance policies** over the **Internet** after the launching of its Web site which offers information about the firm. In future, insurance deals could be done instantly over the Net. A 24 hour service information centre has been established by Viriyah Insurance to provide clients with information on cars, insurance and general information like travel and weather. The firm's IT system is an enormous database which gives efficient information. By the end of 1997, there are plans to expand the centres to all parts of the nation. It is **presently covering** 10 centres in Bangkok and nine provincial centres.

AIG deal switches on Internet policy

US/UK: FIRST **INTERNET INSURANCE POLICY**

Post Magazine (PM) 24 Apr 1997 p.6

Language: ENGLISH

Atlanta US based insurance broker Hamilton Dorsey Alston has joined together with AIG <US insurance company> to launch the world's first **Internet insurance policy**. The new policy is expected to offer a more specific **coverage** as **current** general liability and E&O policies allow risks related to the Internet slip through their cover. The risks that the policy will cover include general damage to equipment, breach of privacy, removal of information by unauthorised personnel, loss of credit card data and the general liability issues that doing business electronically produces. The service will initially be available in the UK with extended coverage expected over time. Companies who get their web sites certified by the US National Computer Security Association will be able to receive a discount on their insurance policy.

ClearCube slashes administration costs -- C3 architecture houses multiple user desktops in one location, simplifying maintenance, upgrades, and support

Orubeondo, Ana

InfoWorld , August 21, 2000 , v22 n34 p42, 44, 2 Page(s)

ISSN: 0199-6649

Company Name: ClearCube Technology

URL: <http://www.clearcube.com>

Product Name: ClearCube C3

Languages: English

Document Type: Hardware Review

Grade (of Product Reviewed): A

Geographic Location: United States

Presents a very favorable review of ClearCube C3 (\$1,095), a desktop management solution from ClearCube Technology of Austin, TX (512). Explains that C3's unique architecture centralizes PCs in a secure and easily maintained location to protect them from corrupted files. Cites its support of Intel Pentium III or Celeron processors, 512MB of RAM, XGA/VGA/SXGA video support, 10/100 Ethernet, three-year **warranty**, ease of deployment, and increased **network** security from the absence of floppy disk drives and CD-ROM drives. Mentions, however, that the lack of floppy and CD-ROM drives causes inconvenience to end users. Concludes that it helps to reduce administrative and help desk support costs. On a scale ranging from 1 to 5, received the rating of 5. Includes a photo and a product summary. (MEM)

Title: Prediction of warranty costs during a given period of time

Author(s): Menzefricke, U.

Author Affiliation: Fac. of Manage., Toronto Univ., Ont., Canada

Journal: INFOR vol.31, no.3 p.127-35

Publication Date: Aug. 1993 Country of Publication: Canada

CODEN: INFRCL ISSN: 0315-5986

Language: English Document Type: Journal Paper (JP)

Treatment: Theoretical (T)

Abstract: This paper considers simple **warranty** policies where a **one - time** expense, possibly depending on the product's age, is incurred at product failure. Interest focuses on the mean and variance of total warranty expense for a given future period. Product purchases are assumed to have a nonhomogeneous Poisson process, and so the actual number of products sold is not known at the time of the forecast. The special case is discussed where the distribution of product failure times is exponential, as is the case when average product failure time is unknown and must be estimated. (5 Refs)

CAF VL-Bus Series

Brown, Bruce

PC Magazine , December 7, 1993 , v12 n21 p189, 1 Page(s)

ISSN: 0888-8507

Company Name: CAF Technology

Product Name: CAF VL-Bus Series

Languages: English

Document Type: Hardware Review

Grade (of Product Reviewed): d

Geographic Location: United States

Presents an unfavorable review of the CAF VL-Bus Series (\$3,797-\$4,653), two 486-based systems from CAF Technology Inc., City of Industry, CA (818). The systems reviewed were a 486DX/33 (\$3,797) and a 486DX2/66 (\$4,653). They are available in desktop, mini-tower, and tower cases. The tower case of the 486DX2/66 reviewed had five drive bays, three externally accessible, but the small-footprint desktop case of the 486DX/33 had seven drive bays, five of which are externally accessible. Benchmark test performance was good in DOS video but poor on the Graphics WinMark tests. Disk performance was near average under DOS but below average in Windows. "High cost and spotty performance make these systems hard to recommend for demanding users ." They carry a **one -year warranty** but on-site service is not available. Includes one photo. (djd)

Itau adota o "self service" para vender ap3lice em loja

BRAZIL: ITAU SELLS POLICIES AT DELLA VIA STORES

Gazeta Mercantil (GMI) 27 May 1998 p. B-5

Language: PORTUGUESE

The Brazilian insurance company Itau Seguros will install displays inside the automotive components (mainly tyres) dealer Della Via Pneus six stores at the Great Sao Paulo, to sell residential and accident **insurance policies**. To contract **immediate insurance coverage**, the client just needs to get the brochure at Della Via stores, pay the R\$ 29 fee and call the insurance company. The policy is valid for 180 days and covers R\$ 20,000 for residential insurance in case of fire and explosion and R\$ 2,000 in case of robbing. For personal accident policies, the insurance covers R\$ 15,000 in case of death for any reason and R\$ 35,000 in case of death related to automotive accident. For only between R\$ 3 and R\$ 10, Della Via clients can contract an insurance policy in the acquisition of Pirelli's tyres which offers a warranty of 50,000 km. In six months the company has already sold 25,000 policies of this kind of insurance. *

European group backs call for cover on Millennium losses

EUROPE: CALL FOR COVER ON MILLENNIUM LOSSES

Insurance Day (AGD) 08 Apr 1998 p.12

Language: ENGLISH

The European Federation of Insurance Associations is calling for insurance cover to be made available to companies which have already made adequate precautions against the Millennium computer bug. Insurance should be given in order to cover any losses which may still occur in spite of their preparation. The Federation is still amazed at the lack of preparation which companies are taking against the bug and an audit of company installations is being called for by Francis Loheoc, the secretary general. The Federation as a whole would like to move away from making people aware of the problem and instead actually taking action against it. So far there have been mixed feelings **presented** concerning **insurance policies covering the issue**.

RI to introduce earthquake insurance policy

INDONESIA: INTRODUCE STANDARD EARTHQUAKE POLICY
Jakarta Post (XAK) 1 May 1996 p.10
Language: ENGLISH

The Indonesian Insurance Council is planning to introduce a standard earthquake policy to get more customers. The new standard policy will separate earthquakes, eruptions and tsunamis under different fire risk **insurance policy**. **Currently**, earthquake risks **covered** in fire risk **insurance policy** combines volcanic eruptios and tsunamis together. The council will calculate the new tariff structure based on a deductible of 2.5% of the total sum insured aand coinsurance percentage of 10% to be paid by the party seeking insurance. The quality of the building and the earthquake-zoning are also the factors that determine the premium rates which range from 0.005% to 2.09% per annum.

Master Maintenance Management (MMM) is both a **single** and multi- **user** maintenance system. All codes are user defined. Planned (scheduled) work order procedures are also user defined. Planned work orders can contain all work processes up to 5,000 characters each. MMM comes packaged with 1,200+ preventive maintenance work processes. Demand (unscheduled) work orders may contain up to 2,000 characters for each work order. Over 75 management reports can be run. Data from other programs can be imported. There are over 100 levels of planned maintenance. Transactions, calculations and updates are performed without any user intervention. Caching up to 32,000 bytes is supported. MMM is Internet/Web enabled.

REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

A discussion of digital signatures and their ability to speed commerce looks at markets where digital signatures will work (banking and financial services, government, health care, insurance, manufacturing, pharmaceutical, and services), and the roadblocks to and advantages of digital signatures. The passage of the Electronic Signatures in Global and National Commerce Act (E-Sign) gives electronic signatures legal status identical to that of handwritten signatures. The legislation will result in lowered cost of customer acquisition and will also reduce the cost of transaction processes, including procurement. Although much commerce is done online, many transactions still require handwritten (ink) signatures on contracts and other legal documents, which still have to be sent back and forth to finalize a deal. Financial services will see the most impact from digital signatures, since the many documents and transactions related to mortgages, **insurance policies**, **service contracts**, and business-to-business (B2B) transactions, can all be consummated more quickly online with e-signatures. Among topics briefly **covered** are digital signature technologies **currently** available, including those from ApproveIt, Cyber-Sign, PenOp, and others, simplified supply chain relationships, and differences between pre-existing state e-sign laws and the federal E-Sign Act.

CONTACT: Sales Department

Facilities Management System 4.2 for Windows facilitates management of entire telecommunications systems. Modular integration, relational databases, network access, and a familiar Windows Explorer-like interface provide accurate, up-to-date information vital to telecommunications operations. The Inventory Management module tracks a variety of predefined inventory such as PBXs, phones, and PCs as well as any user-defined class or part. This tool quickly surveys all items available, reserved, assigned, damaged, in repair, or retired. Parts can be assigned as recurring or **one time** charges back to any organizational level through part/serial/PO numbers, manufacturer, vendor, alternate vendor, model, minimum stock level, **warranty**, and lease information. The Work Order module manages minor service functions as well as pre-planned major projects. Each work order can have up to 19 independent sub-orders tracking multiple technicians and a variety of tasks. Each sub-order can be completed while the entire work order project remains open. The Work Order module can also serve as a useful help desk tool to quickly determine WO status. WO charges for labor and material can be posted to Consolidated Bills and charged back to any organizational level. Estimated labor hours can be compared to actual billed labor, due date charges, due dated against completed dates, thus improving budgeting and technician productivity. The Directory Lookup module delivers an instant up-to-date corporatewide directory for reception activities. Phonetic and cascade searches provide quick and easy access to directory information. The scrollable grid includes alternate numbers for non-published extension, in addition to home, car, fax, pager, DID, e-mail, and two other user-defined fields. The Consolidated Bill phone call, inventory, line item, and work order charges on one bill. Detail and summary bills are available at any organization level or extension. Recurring charges can be prorated and taxes can be applied. The Cable Tracking system provides efficient management of circuits, ports, distribution frames, blocks, terminals, jacks, cables, and cable pairs. Standard templates can be created for non-standard block, jack, and cable configurations. TIA/EIA 606 standards are implemented within the cabling models for both voice and data facilities.

A spokesperson for Honor International, a Miami computer retailer and wholesaler, explains why Honor put away Intuit's QuickBooks and began using Icode's Accware accounting software. Even though switching out the mostly manual accounting software that has been used for many years can seem difficult and uncertain, small companies can streamline accounting with automated products and make the migration smoothly with proper planning. Honor found that QuickBooks could not handle its substantial sales information, which comes from orders received online and offline in the U.S. and the Caribbean. Many types of information have to be accounted for, including shipping charges, quotes, **warranties**, serial numbers, orders, inventory, contact information, and other data. Honor researched multiple software products before purchasing Accware, which Honor later upgraded to accware online for its e-commerce abilities and links to sales and accounting information. Two other users describe why they moved from mostly manual accounting tools to QuickBooks. When choosing a package, purchasers should check with colleagues working in similar fields and obtain recommendations, and they should make their transitions gradual and incremental. For instance, **one user** who migrated to QuickBooks ran manual books beside the program for the first two months.

Many dissatisfied Digital Subscriber Line (DSL) customers in various locations in the U.S. where DSL is available are reporting inoperable or intermittently running connections. One says 'It's a joke...Everyone I know is having the same problems.' One user, a Web developer, has waited three months for DSL and reports that one technical support person told him, 'We never return messages.' DSL, which is not currently available everywhere, does work often but many negative scenarios have been reported. In New York, for instance, Bell Atlantic is being sued by seven customers charging that the company engaged in deceptive advertising and breach of **warranty**. Bell Atlantic lawyers deny making overblown promises. Many U S West customers are turning down DSL services since they have been put off by much anecdotal evidence of unacceptable service. According to a spokesperson for Bell Atlantic, the problems arise because DSL is a new technology. Problems are often due to unexpected high demand for service and the dearth of qualified personnel. Phone companies are having difficulty hiring and retaining trained DSL technicians, and DSL infrastructure is not the plug-and-play variety. According to SBC Communications, which has added hundreds to its DSL support staff, 'The vast majority of our customers are having a good experience with DSL.'

Lotus Development's Domino is the basis for iemagine.com, a suite of rentable business applications. Features include online auctions, reverse auctions, surveys, comment cards, and **warranty** registration. These abilities allow companies to use the Web to increase revenue, reduce costs, obtain market data, and enhance customer relationships. Application rental is proving to be a quicker, less costly way to get started in Web-based e-commerce, especially for projects that involve specific, limited activities, such as one - time auctions or surveys. Components of the Iemagine suite are: AuctionPool, which allows users to put multiple items in an auction, establish minimum bids, and provide product information; TeamSurvey, for gathering information from customers, suppliers, staff, and other groups, who fill in the survey via an e-mail message with a URL and password; TeamComment, which gathers, tabulates, and reports on the performance of various facilities and services; and TeamPurchase, which provides reverse auctions to set up Requests for Purchase Quotations and sends them to bidders with password-protected to a URL. Bob Curry, director of technology and co-founder of Iemagine, says his service is an economical way to provide business-to-business (B2B) auctions of limited duration.

PRODUCT NAMES: Cable Modems (840378); DSL (840386)

TITLE: Net Speed!: Leave your 56Kbps Modem in the Dust--Cable Modems...
AUTHOR: Hamilton, Dave
SOURCE: MacAddict, v4 n9 p26(5) Sep 1999
ISSN: 1088-548X
HOMEPAGE: <http://www.imaginemedias.com>

RECORD TYPE: Review
REVIEW TYPE: Product Comparison
GRADE: Product Comparison, No Rating

Cable modems connect to the Internet at high speeds via the cable TV coaxial cable. It is a small box with a network interface that routes traffic between the user's Mac and the cable network. Most use two channels, one send, **one** receive, and allow **users** to surf the Web and watch TV simultaneously. Cable modems are full-time, dedicated connections so there are no busy signals. They have download speeds at least 15 to 125 times faster than a 56-Kbps modem. Drawbacks of cable modems are weak support from cable companies and limited availability. Prices for a typical cable modem box and service average \$45 per month plus \$50 to \$100 for setup. Digital subscriber lines (DSL) are another popular method of high-speed internet access available from the phone company. Users can access the Internet and talk on the phone at the same time. DSL has download speeds at least six times faster than analog modems and provides dedicated connections, which mean no dial-up time or busy signals. Drawbacks are the technology hinges on the distance of the users' home to the phone company's central office, so it may not be available for every home and the further the site is, the slower the maximum connection speed. Basic DSL packages cost from \$29 to \$150 depending on the speed level. Internet access is a separate cost. Many companies offer substantial discounts for long-term **service contracts**. If users have a choice between cable modems and DSL, they should investigate bandwidth crowding, startup costs, reliability and widespread, dedicated access.

CorelDRAW! 6's announcement brought cheers from users at a Comdex/Canada show, but many of the same users are still trying to get the program up and running. Some problems reported include an instant IPF with the Opening Layer Manager; two fonts in a word causing a system crash during save; resulting file corruption when the product saves a CorelDRAW! 5 file; and too little support for scanners in the PhotoPaint module. **One user** filed a class action suit against Corel, citing lack of reliability, improper programming before sale or distribution, and breach of **warranty**. Corel plans a strong challenge to the suit. An analyst says many problems are related to hardware, and that some users are just fed up with hard to install software. The Corel World Wide Web site includes about 30 bugs described by users.

Microsoft continues work on melding Windows 4.0 and Microsoft Windows 4.1 with Windows NT and Windows NT Advanced Server. Windows 4.1 is a 32-bit product that provides object file systems and networking supporting Cairo, the next generation of Windows NT. A Microsoft official states that Windows 4.1 will either supersede Windows 4.0 or be a set of libraries that can be added to it. Microsoft Windows for Workgroups 3.x will reside between Windows 3.x and Windows 4.0. **One user** who sees object-oriented (OO) desktop and server OSs as part of his computing plans predicts that Windows NT Advanced Server will become a real OO system for parts, service, and other functions; Chicago will replace Windows. This configuration will give his freight transportation firm more reusable code and intelligent objects that modify themselves to support various **warranties** and manufacturers.
